### Methods inherited from class android.support.v7.widget.RecyclerView.ViewHolder

`getAdapterPosition`, `getItemId`, `getItemViewType`, `getLayoutPosition`, `getOldPosition`, `getPosition`, `isRecyclable`, `setIsRecyclable`, `toString`

### Methods inherited from class java.lang.Object

`clone`, `equals`, `finalize`, `getClass`, `hashCode`, `notify`, `notifyAll`, `wait`, `wait`, `wait`

## Field Detail

### **delete**

```
private android.widget.Button delete
```

Contains the Button of the break's delete button

### **dayView**

```
private android.widget.TextView dayView
```

Contains the TextView of the break's day

### **fromTimeView**

```
private android.widget.TextView fromTimeView
```

Contains the TextView of the break's begin time

### **toTimeView**

```
private android.widget.TextView toTimeView
```

Contains the TextView of the break's end time

## ***Constructor Detail***

### **MyViewHolderSchedule**

```
public MyViewHolderSchedule(android.view.View itemView)
```

## ***Method Detail***

### **bind**

```
public void bind(Break myBreak)
```

Binds the break's day, begin time and end time to their respective TextView variables.

### **getDelete**

```
public android.widget.Button getDelete()
```

Getter for delete.

### **setDelete**

```
public void setDelete(android.widget.Button delete)
```

Setter for delete.

### **getDayView**

```
public android.widget.TextView getDayView()
```

Getter for dayView.

### **setDayView**

```
public void setDayView(android.widget.TextView dayView)
```

Setter for dayView.

### **getFromTimeView**

```
public android.widget.TextView getFromTimeView()
```

Getter for fromTimeView.

### **setFromTimeView**

```
public void setFromTimeView(android.widget.TextView fromTimeView)
```

Setter for fromTimeView.

### **getToTimeView**

```
public android.widget.TextView getToTimeView()
```

Getter for toTimeView.

### **setToTimeView**

```
public void setToTimeView(android.widget.TextView toTimeView)
```

Setter for toTimeView.
